PROFESSIONAL SUMMARY

Motivated and detail-oriented full-stack developer with a strong foundation in web technologies, JavaScript frameworks, and backend development. Skilled in building responsive, scalable, and user-centric applications using React, Node.js, and MongoDB. Eager to contribute to impactful projects and gain hands-on experience through internships or full-time opportunities.

TECHNICAL SKILLS

Frontend: HTML, CSS, TailwindCSS, JavaScript, TypeScript, React.js, Framer Motion

Backend: Node.js, Express.js, REST APIs, MongoDB

Mobile Development: Java (Android), Kotlin

Programming Languages: Java, Python, C, C++

Tools & Technologies: JSON, XML, SQL, Jupyter Notebook, Shell/Bash, Git, GitHub, Environment Configuration (.env)

PROJECTS

Moodify - https://moodify-wine.vercel.app/

Developed a mood-based music recommendation app that dynamically generates playlists using API integration and user sentiment detection.

Tech Stack: React, Node.js, Express.js, MongoDB, REST APIs

GhostPrint Web - https://ghostprint-web.netlify.app/

Built an AI-powered printing and design web application enabling users to create, preview, and manage custom print assets.

Tech Stack: Next.js, TailwindCSS, Framer Motion

Spotify Clone - https://s6ulm9.vercel.app/

Created a Spotify-inspired web music player with playlist management and authentication features.

Tech Stack: React, Node.js, CSS, REST APIs

EDUCATION

Bachelor of Technology (B.Tech) - JNTU Rajanna Sircilla

Diploma in Engineering - TRR College of Technology

Secondary School (SSC) - Lords Talent High School
